COLLABORATING ON QUALITY

We know that the quality of child care matters to parents, providers, and communities as a whole.

We are the leading expert and resource for quality child care in Idaho.

We empower parents and providers to make safe, healthy, nurturing and educational child care a top priority.

We support child care providers to continually improve early care and education practices.

FOR PARENTS

Choosing a child care provider is a major decision for families.

IdahoSTARS makes it easier to find quality early care by providing parents with personal, reliable tools and information.

When parents begin their search for child care, IdahoSTARS can connect them with providers who demonstrate a commitment to quality through continued engagement with our project.

FOR PROVIDERS

Through trainings, educational opportunities, and resources, child care providers can improve their profession and develop their businesses.

IdahoSTARS offers professional development, financial incentives, and a variety of resources to child care providers throughout Idaho.

We support child care providers to continually improve the quality of early care and education provided to families. By engaging with the IdahoSTARS project, child care providers have access to resources and quality standards to offer the best care possible.
